

....much more than a beautiful roof

Dear Bharath ,

Thank you very much for the opportunity to earn your valued roofing business. You will find the enclosed quotation and information for your review and consideration. We are very confident you will find the overall value represented through our products and services to be the very best available. Please take a few moments now to review the contents herein thoroughly so that you have the necessary information to make the best decision for your home.

The Nulok System, Ceramic Stone Tile and Natural Slate Roof Covering Range.

Nu-lok is a unique, technically superior, lightweight fixing system. which offers extraordinary structural integrity. This Australian developed system is compatible with our range of quality Ceramic Stone Roof Tiles and our vast range of quality Natural Slate Roof Coverings from around the world.

The revolutionary patented grid system incorporating a matrix of metal battens, link channels and stainless steel clips is ideal for Australia's harsh climate. The **Nulok System** has proved to be a huge success internationally in countries such as the UK, New Zealand, Ireland, and North America, adapting to the extreme weather patterns of the respective local environment.

The **Nulok System** has the ability to resist wind loads of up to 225kms on the designed roof and has even passed cyclone testing in the USA. Due to the systems unique link channels, only half the quantity of slate or tiles is required over traditional methods, dramatically reducing fixing time on site. The system is ideally **suitable for Prestigious Residential and Commercial applications** offering a comprehensive **written 50 year warranty** plus independent **IAB and BBA certification**.

Nulok introduces the revolutionary Seamless Solar System

Designed to fit seamlessly and flush with the Nu-lok Ceramic Tile and our range of quality Natural Slate Roof Coverings, our **Seamless Solar Panels** fit beautifully into the matrix of metal battens and link channels requiring no extra fixings or screws. Rather than being placed on top of your roof (like the unsightly roof rack system commonly used throughout Australia), our **Seamless Solar System becomes part of the roof covering sitting flush to the roofline.**

On request we can supply a list of recently completed Nu-lok™ jobs throughout the Sydney area. I welcome you to drive by these sites to see for yourself, the incredible finished effect a Nulok™ Roofing System can have on your property.

As always, we pledge to offer you the very best in customer service and quality workmanship. No surprises, excuses or hidden additional costs, we set ourselves the very highest standards so you should expect quality from start to finish.

Thank you once again for your interest in our range of products and services. I look forward to working with you in the near future.

Regards,

Randal Stevenson
Managing Director
