

**....much more than a beautiful roof**

Thank you very much for the opportunity to quote on your new roofing project. We are confident that a Nulok roof will provide your best solution both now and into the future. Please take a few moments to thoroughly review the enclosed quote to ensure all of your requirements have been met. Here are some points to consider when making your decision to install a Nulok Roof.

Nulok offers a 50 year product warranty .

Nulok is a unique, technically superior, lightweight fixing system, which offers extraordinary structural integrity. Developed in Australia, the system is compatible with our Ceramic slate and ceramic tiles.

The Nulok system uses a revolutionary patented grid system incorporating a matrix of metal battens, link channels with stainless steel clips that lock the whole roof into place. The Nulok System is used internationally including Europe, UK, New Zealand, Ireland and North America.

A Nulok roof can resist winds of up to 225kph, even passing cyclone testing in the USA, plus Nulok has independent IAB and BBA certification. The system's unique link channels require only half the quantity of roof tiles compared to traditional installation methods - dramatically reducing fixing time.

Exclusive Nulok Integrated Solar Energy

Nulok's exclusive Integrated Solar fits seamlessly into our system at the same height and length as the roof tiles and slate. Unlike the unsightly solar roof rack systems commonly used, Nulok Integrated Solar Inserts becomes part of the roof sitting flush with the roofline. Please check out the list of recently completed Nulok projects from throughout the Sydney area and see for yourself how a Nulok Roof increases the value of any property.

We pledge to provide you with the very best in customer service and quality workmanship. No surprises, excuses or hidden additional costs. We set ourselves the very highest standards so you should expect quality from start to finish.

I look forward to working with you in the near future.

Kind Regards,

Randal Stevenson

Managing Director
